

The NGC Registry is the most powerful and enjoyable tool available to the numismatic community. Over the next few months we'll be telling you about all the user-friendly features, dramatic growth, and scoring improvements we believe make us the hobby's most progressive registry.

Appraise. Appreciate. Evaluate. Impartial, dynamic pricing information at your fingertips.

At NGC, we understand the passion of collecting. We also understand the interest collectors have in the value of their prized possessions.

That's why the NGC Registry has teamed with *NumisMedia* to provide an impartial and inclusive resource for coin prices. On **your private and secure** Registry page, you will see the official *NumisMedia* price information in addition to your point score. Use these values to inventory and document your collection, or just have a better understanding of your coins' worth in the marketplace.

This dynamic pricing report is updated monthly, reflecting the most current market data available. Any Registry member may view coin prices up to grade MS 60, and paid Collectors' Society members may view prices on higher-grade coins.

Visit the NGC Registry today — For all the right reasons.
